

# 'BO'

DOB 03/07/2023

**MICROCHIP NO: 956000011358460**

If you are looking for a young male Dobermann, Bo might just be your match.

He is a 16-month-old black/tan male, not desexed (as yet), is vaccinated and microchipped.

Date of birth: 03/07/2023

Purchased from a non-registered breeder, therefore registration papers are not available.

The owner purchased two Dobermanns from the same litter and the female Charlie is ruling the roost and sibling rivalry has commenced.

Both are beautiful, loving dogs. They do look after each other and get along most of the time, although Charlie does tend to be more protective and jealous than Bo. This has been causing arguments between them and creating quite a stressful home environment for the dogs and family. Regretfully, for the sake of the dogs, they have chosen to put Bo up for adoption as he is more confident than Charlie and would take to a new family easier.

Bo has been brought up in a loving house around teenagers. Spending the day inside and outside of the house, he does stay inside during the evening. He has not had a lot of association with other dogs or around other animals apart from chickens. Like most dokes, he wants to be around his owner as much as possible and has lots of love to give.

If you believe you can give Bo a forever home, please contact

**DCV Puppy Officer on 0407 869 493 or current owner Gordon on 0457 686 717**
